EDUCATION

University of Technology Sydney

Bachelors of Engineering (Honours), Bachelors of Business

- Majoring in Software Engineering and Human Resource Management | WAM: 75+

Sydney, NSW

2022 - 2026 (Expected)

WORK EXPERIENCE

Advanced Navigation

Application Engineering Intern

Sydney, NSW

August 2025 - Present

- Contributed to the APAC Go-To-Market and Customer Success team by bridging engineering and sales teams to improve product usability, cross functional collaboration and customer experience.
- Investigate customer issues through root cause analysis, identifying system performance gaps and informing product improvements for commercial and defense applications
- Analysed NPS and support data across 90+ customers, identifying trends that improved product adoption and support efficiency
- Led the global rollout of Field Evaluation Kits used by 10+ engineers across 3 regions (APAC, EMEA, AMER), standardising customer evaluation processes
- Conducted time critical analysis of product testing datasets to define specifications for non standard customer use cases, supporting large commercial opportunities and strengthening client confidence
- Evaluated and improved AI (AI) outputs across 25+ test cases, enhancing accuracy and usability of AI workflows
- Authored 75+ technical customer facing knowledge base articles and established usage metrics to guide continuous improvement

Powerhouse Museum

AI in Space Intern

Castle Hill, NSW

July 2025

- Collaborated with Space Machines Company and ING Bank to design activities exploring spacecraft design, generative AI and ethics of emerging technologies for 20+ students
- Facilitated design and pitching activities using AI tools, guiding students through creative problem solving and technology driven innovation

Optik Consultancy

Software Engineering Intern

Botany, NSW

November 2025 - February 2024

- Delivered a client facing automation solution to analyse BIM (Building Information Modelling) models and streamline manual construction workflows for Hilti Australia
- Applied spatial data analysis using C#.NET to extract and evaluate engineering data from 3D models.
- Collaborated within a multidisciplinary team to deliver a scalable solution within 12 weeks, improving efficiency in the internal quotation process

LEADERSHIP EXPERIENCE

UTS Business School

Business Mentor

Sydney, NSW

August 2024 - Present

- Mentored 75+ students and facilitated learning sessions across cohorts of 500+ students, improving engagement and understanding of core accounting and business concepts.

University of Technology Sydney (Faculty of Engineering & IT)

Student Ambassador

Sydney, NSW

August 2023 - December 2025

- Represented the Faculty of Engineering & IT at university outreach events, engaging prospective students and communicating academic and career pathways.
- Partnered with marketing and faculty teams to coordinate large scale campus events with 10,000+ attendees and improve student engagement.

Code Camp

Coding Educator

Sydney, NSW

March 2024 - August 2025

- Delivered STEM workshops to 100+ students, increasing enrolments by 35% through effective engagement and tailored support

PROJECTS

[SME Growth Recommender Platform](#)

- Co-led development of data driven platform to identify high growth SMEs and support strategic decision making
- Built a proof of concept using React, TypeScript and MongoDB; presented to Business NSW, securing further funding
